DETAILED ACTION

1. Claims 2-4,7-14,17-18, and 21-34 have been cancelled.
2. Claims 1,5-6,15-16, and 19-20 are pending.

Allowable Subject Matter

3. **Claims 1,5-6,15-16, and 19-20** are allowed.
4. The following is an examiner's statement of reasons for allowance: The present invention is directed toward a method and system for creation and use of strong passwords with high entropy, to protect against an adversary obtaining the questions and answers generated for each user. Each independent claim identifies the uniquely distinct features "**combining the plurality of questions and answers into a single pass phrase, wherein the plurality of answers are hashed together to form a hashed answer, storing the hashed answer on a separate remote server and obtaining a retrieval question and answer to display a plurality of questions**". The closest prior art, Khan et al. (US Patent No. 6,401,206) discloses a portable digital identity that includes personal information and may include data representing the person's handwritten signature and one or more passwords. However, Khan et al. fail to disclose obtaining a strong password, storing the hashed answer on a remote server without storing the actual answers, and the use of a retrieval answer and question being displayed. Furthermore, Khan et al., either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.
5. Therefore, **claims 1 and 15** and the respective **dependent claims 5-6 and 19-20** are in condition for allowance.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
